

Online Patient Enrollment Solutions

Customizable solutions to fit your needs and budget.

With more than 80,000 clinical trials, CenterWatch's *Clinical Trials Listing Service™* is the largest online listing of industry-funded clinical trials and currently receives over a million unique visitors to its trial listings annually making it a proven and effective forum for online patient recruitment.

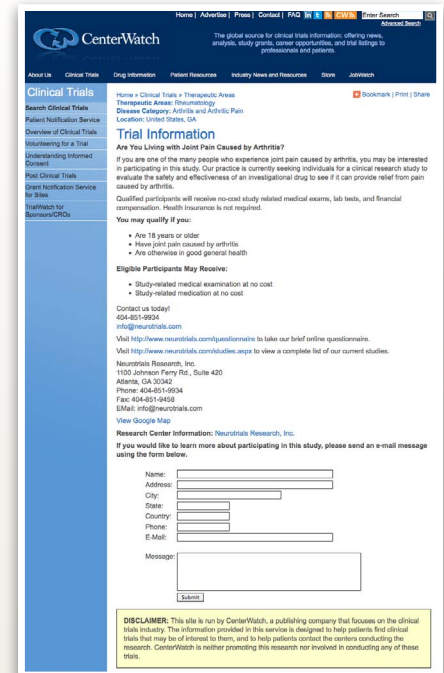

CenterWatch has partnered with more than 2,500 companies with the purpose of giving each of them the best opportunity to reach potential study volunteers. Our vast experience and long-term relationships with these companies—from pharma, biotech and medical device sponsors to CROs—have shown that many of our customers have very distinct needs. Therefore, we have developed a suite of comprehensive custom solutions specifically designed to meet a range of requirements to help our customers reach their patient recruitment goals.

Custom solutions include:

- Complete clinical trial listing management, including edits, additions and deletions with client approval and traffic reporting (also available for ClinicalTrials.gov registrations)
- Client-controlled, self-service clinical trial listing management via a password-protected web application with traffic reporting
- Choose the plan that fits your budget and needs: post single or multiple studies monthly, quarterly, semi-annually or annually
- Development and deployment of custom email messages

For more tips and strategies for patient recruitment, order a copy of our new guide, *Global Issues in Patient Recruitment and Retention*. Visit <http://store.centerwatch.com> for more information.

If you are looking for additional services, just ask. Our outreach team is ready to work with you to create a custom solution that is not only tailored to your needs, but to your budget.
